EDUCATION

Far Eastern University Diliman | September 2026
Bachelor of Science in Information Technology — Specialization in Web and Mobile Applications

WORK EXPERIENCE

Lamina Studios, LLC | Web Developer Intern (Remote) | January–July 2026

- Developed Laravel reporting endpoints for subscriptions, fleet costs, driver performance, dispatch, inventory, and maintenance, providing dashboard-ready responses using sample data.
- Implemented MySQL filtering, pagination, tenant scoping, subscription-based access, and CSV exports, enabling scoped reports and downloadable datasets in the internship prototype.
- Tested API responses, documented endpoints, and submitted feature branches through Git, preparing analytics work for team review and integration testing.

Independent Sneaker Venture | Entrepreneur / Online Store Owner | Started 2018

- Managed sourcing and sales through StockX™, GOAT™, Alias™, and SNKRDUNK™, generating over USD 437,000 in international sales and PHP 5 million in local sales.
- Built Excel tools for income, expenses, and sales trends, consolidating records to monitor business performance.

Philippine Coconut Authority | Data Entry Clerk | Apr–Jun 2018; Aug 2019–Jan 2020

- Digitized coconut farmer records nationwide, converting source information into electronic records for the agency.

CODING PROJECTS

WEB AND MOBILE APPLICATION SALES AND INVENTORY MANAGEMENT SYSTEM WITH TIME-SERIES-BASED CHICK YIELD PREDICTION AND GREEDY ALGORITHM-BASED ORDER FULFILLMENT FOR DOMINANT ASIA LIVESTOCK GENETICS, INC.

Full-Stack Developer (Backend, Frontend) | Main Web Application Developer | Academic capstone

- Built most of the React/Laravel/MySQL sales and inventory web application, combining e-commerce and ERP-related workflows into a prototype demonstrated at final defense.
- Integrated PayMongo API checkout functionality and OpenStreetMap delivery visualization, adding payment-gateway and geographic delivery features to the academic prototype.
- Integrated Python time-series forecasting and Google OR-Tools allocation with Laravel, generating chick-yield forecasts and order-fulfillment proposals that balance available stock, urgency, waiting time, and geographic grouping.
- Delivered the main web application contribution, helping the team earn Best Mobile Application, Most Innovative, and Best Capstone Project (BSIT-WMA), with a 99.2% defense score.

Repository: github.com/202210215FEU/WebApp

JLED Coffee | Developer — Coursework Application

- Built a PHP/CodeIgniter MVC application, combining login, menu management, bookings, and customer profiles into a coffee shop system for coursework demonstration.

FEU Merch Shop | Developer — Android Coursework Prototype

- Adapted a Java/XML template with customized branding, product displays, cart behavior, and Firebase data handling, producing an FEU merchandise browsing and cart prototype.

SKILLS

Web & mobile: React, JavaScript, PHP, Laravel, CodeIgniter, HTML/CSS, Java, XML, Expo.

Data & tools: Python, MySQL, PostgreSQL, Firebase, Google OR-Tools, API integration, Git/GitHub, Excel.

Additional exposure: Amazon EC2, Google Cloud Compute Engine, Windows Server, UI/UX, Photoshop, SAP S/4HANA.

Certifications: Certiport IT Specialist — Python; IT Specialist — Networking.

Cisco badges: CCNA: Enterprise Networking, Security, and Automation; CCNA: Introduction to Networks; CyberOps Associate; DevNet Associate.
